

Hiring Announcement

Job Title: Research Intern
Job Location: Saint Augustine, FL
Salary: Commensurate with experience

Job Summary:

Vitis Energy, a leading wholesale power generator and developer, is seeking a part-time Research Intern to assist our renewable energy development team.

The ideal candidate will assist staff with energy market research and analysis. Working with our team of engineers, analysts and project development professionals, you'll help conduct the critical research and data analysis needed to inform strategic development decisions. Excellent communication skills are a must for this position in order to analyze and share data with both colleagues and development partners.

Required Skills/Abilities:

- Conduct energy market research as assigned
- Monitor local, state and national regulatory issues
- Share relevant research with staff to inform strategic development decisions
- Work collaboratively with project development and engineering staff to deliver projects on time and within budget

Education and Experience:

- Bachelor of Science or relevant coursework in Business Administration, Statistics, Economics or related field
- Strong research and data analysis skills
- Excellent verbal, written and interpersonal communication skills
- Highly motivated, team-oriented self-starter

Travel: As required, up to approximately 25% of time

Type of Position: Part-time internship, with potential for full time employment
